The USDA Forest Service, San Bernardino National Forest is coordinating a meeting to discuss community solutions that will address wildfire risk to Oak Glen.

The meeting will detail efforts that have been initiated by the US Forest Service, California Department of Forestry, and coordinating Fire Safe Councils. A presentation will show fire history, areas that are at risk, and what could occur should a catastrophic wildfire event were to happen. Current projects to address these concerns will be discussed.

However, due to land ownership patterns in Oak Glen, a long term, community based strategy is deemed essential to address the wildfire risk. Please join us as we start the Fireshed Assessment; a process developed to involve communities, landowners, agencies, and local government in solving community wildfire protection issues.

We Need Your Help—Thank You
